Profile

Seasoned full-stack developer with over 4 years of dedicated experience in web development and software engineering.

Proficient in crafting management solutions for scalable and resilient applications, I specialize in utilizing a diverse range of technologies, including React, React Native, Next.js, NodeJS, and Electron, among others.

My expertise spans across various domains, rigorous testing methodologies, and the development of both backend and frontend systems, as well as mobile applications. I thrive on tackling complex challenges head-on, consistently delivering effective solutions.

Key Skills:

React: 4+ years

NodeJS: 4+ years

JavaScript: 4+ years

TypeScript: 4+ years

React Native: 2+ years

VueJS: 1 year

Electron: 1+ years

Professional Experience

Tipspace

04/2022 - 09/2023

Senior Software Engineer

Technologies: React, Electron, NodeJS, Typescript, Javascript, Next.js

Featured libraries: Styled components, Prisma.js, Jest, Vitest, Express.js.

Main activities:

- I worked on the desktop application
 - Architected the entire application infrastructure
 - Integration with the League of Legends game
- I worked on the server
 - Payment integration
 - Execution of monetary transactions between the platform and players
 - Competitive matchmaking
- CI/CD
 - Frontend: Pipelines for running tests and building the Electron application

- Backend: Pipelines for deploying the server to staging upon merging with the main branch

Consulta Remédios

08/2020 - 04/2022

Senior Software Engineer

Technologies: React, NodeJS, Typescript, Javascript, Next.js, React Native, Vue.js

Featured libraries: Styled components, Jest, Motion, Firebase.

Main activities:

- I worked on the web application
 - Improved website performance
 - Implemented new features
- I worked on the mobile application
 - Refactored Android/Swift code to React Native
 - Implemented and integrated delivery methods

MáximaTech

08/2019 - 08/2020

Fullstack Javascript Developer

Technologies: Angular, Java, Spring Boot, JSF

Featured libraries: Material-ui, Firebase

Main activities:

- I worked on the web application
 - Implemented new features
 - Integration with Google Maps
 - Creating delivery routes using Google Maps
- I worked on the server
 - Implemented new features
 - Implemented driver monitoring in conjunction with the mobile application

Languages

Portuguese • English

Education

Bachelor's in Information Systems

UFG - Federal University of Goiás

03/2018 - present

Goiânia, Brazil
